Project Title: Panda Website

https://en.wikipedia.org/wiki/Giant_panda

I'd like to build this site as multiple pages, rather than a single scrolling page. The navigation bar will be placed at the top for easy access to different sections.

- **Home Page / Introduction**

Highlight their unique physical appearance, global recognition, and importance in wildlife preservation. Include some photos.

- **Behavior**

Focus on their physical characteristics, diet, reproductive behavior, and daily habits. Include fun facts and maybe some illustrations.

- **Habitat**

Focus on where they live, what kind of environment they need, and how human activity has impacted their natural habitat.

- **Conservation Efforts**

Detail the history of pandas being endangered, the current progress of conservation efforts and breeding programs. Include statistics, maps, and quotes.

- **Gallery**

A photo gallery of pandas in the wild and in conservation centers. Possibly interactive or carousel-style.

- **Sources and Credits**

List the Wikipedia page, any books or articles referenced, image sources, and other attributions.
